DANIEL ARMAS ROBLES

Education

University of the Armed Forces ESPE — Sangolquí, Ecuador
Software Engineering - Graduate — Graduation Date: August 2026.

Experience

Security Data — Quito, Pichincha, Ecuador

Development Intern — February, 2026 – July, 2026

- Prepared QA documentation and technical logs in GitHub, ensuring version control and continuous updates to documentation as new business features were implemented.
- Optimized user interfaces (UIKIT) and the microfrontend architecture using Angular and TypeScript, managing models and improving data flow through signals and global HTTP interceptors.
- Designed and executed automated test suites, using Mockito to validate the Java backend and advanced Vitest and Jest configurations to ensure frontend quality.
- Managed schemas and implemented structural updates to PostgreSQL relational databases using DBeaver.
- Developed and implemented key improvements to a Java Spring Boot microservices architecture, optimizing authentication, digital signature management, service access, and credential-request modules.
- Provided advanced technical support and resolved cross-platform issues across multiple digital platforms, maintaining strict repository management using Git and GitHub.

IDC Mayoristas en Computación — Sangolquí, Pichincha, Ecuador

Web Support and Development Intern — October, 2025 – January, 2026

- Improved bulk uploading of product images to the database through the WordPress CMS.
- Resolved critical issues and website outages by debugging and modifying PHP code snippets and optimizing the company's website plugins.
- I managed the update of the production product catalog, successfully increasing the department's operational efficiency and productivity by 75 %.

Ai Connect Solutions — Remote, United States

Development Intern — September, 2025 – October, 2025

- Designed and developed multiple landing pages for businesses and events using platforms such as WordPress and GoHighLevel.
- Automated scraping, message delivery, and document-generation processes using n8n.

- Established database connections by managing nodes and SQL APIs, implementing queries and CRUD operations within automated workflows.
- Integrated various APIs into automation projects, efficiently managing data in JSON format.

Technical Skills

Programming: JavaScript, TypeScript, C#, C++, Java, Python, Dart; REST API and CRUD development.
Databases: SQL, NoSQL, MongoDB, SQL Server, Oracle, PostgreSQL, MySQL, Firebase/Firestore, DBeaver.
Frameworks, Design, and 3D: React, React Native, Angular, Express, NodeJS, Spring Boot, Bootstrap, TailwindCSS, Figma, Flutter, Wordpress, Apify, Unity, Blender.
Virtualization and Development Environments: Docker, virtual machine management (VMware, Virtualbox), deployment on Vercel and Render, GCP, Azure, Stripe, Cloudinary, microservices optimization.
Testing and QA: Postman, SonarQube, Mockito, Vitest, Jest, Thunder Client, Selenium.
Automation and Artificial Intelligence: Scikit-learn, XGBoost, YOLOv11, TensorFlow, modelos CNN, n8n, Retell Ai, prompt engineering, LLMs.
Continuous Integration and Management: Git, GitHub, ClickUp, Notion, Jira, Plane, Asana, agile methodologies such as Scrum and process modeling tools (BPMN).

Projects

CYHBA (Check Your Health Because Alcohol) APP
A mobile application developed with Flutter/Dart that uses artificial intelligence tools (TensorFlow and PyTorch) to predict heart diseases associated with alcohol consumption based on user-provided factors. Data is stored in MongoDB, and predictive analysis is performed using machine learning algorithms implemented with Scikit-learn and XGBoost.

Website - Aliñambi School
An institutional website designed to increase visibility and streamline the administrative management of the Aliñambi Fiscomisional Specialized Education Unit. The system was built using modern technologies such as React, Node.js, and Express, integrating UI frameworks such as Bootstrap and Tailwind CSS. MongoDB Atlas was implemented as a NoSQL database to ensure efficient and secure management and storage of institutional data.

Live website demo: https://eebfalinambi.vercel.app/

Website - Fitness Pro EC
A gym website built with WordPress and hosted on Hostinger. Using an iterative and incremental methodology, the full project lifecycle was managed, from requirements elicitation to production deployment. The responsive layout of the informational section was built with Gutenberg container blocks, alongside interactive features and customization using embedded JavaScript and CSS. The website also includes security features and optimized multimedia loading through backend cache settings and strategic minification exclusions configured with LiteSpeed Cache.

Live website demo: https://fitnessproec.com/

ECUREGIONES VR - Virtual Reality Educational Application
An immersive virtual reality application designed to explore geographic references through multi-room 3D environments. The simulation was built using Unity and Blender, with the XR Interaction Toolkit integrated to support advanced player teleportation mechanics. The application features simulated camera systems using XR Origin and resolves mesh and material rendering conflicts to ensure a smooth, visually consistent user experience.

Multi-Room Chat with WebSockets
A web platform built with ReactJS and Tailwind CSS that enables real-time communication among users in multiple rooms through WebSockets. The Node.js backend uses JWT for authentication and CORS as an access-control mechanism.

Rumba GO APP
A social networking mobile application developed with Flutter/Dart, featuring Firebase authentication and storage. It supports venue and user management through reviews, personalized notifications, and geolocation using the Mapbox library.

Soft Skills and Interests

Soft skills: Empathy, commitment, adaptability, resilience, communication, accountability, leadership, analytical problem-solving, teamwork, discipline, and continuous learning.

Interests: Data science, DevOps, artificial intelligence models, cybersecurity, process automation, CRM systems, and web development.

Languages

Spanish (Native), English (B1)
